The market for Hogs is rather firmer, with The market for Hogs is rather firmer, with several buyers in the market to-day at \$5.25 net, but we heard of only small transactions—about 100 head—at the above quotations, cash. There are no Hogs offering, though they could readily be sold at \$5.25 net, and extra heavy would command an advance on the above quotation. There are still a large number of Hogs in the country, which have never been offered to the market, and which the farmers are holding, in which have never been offered to the mar-ket, and which the farmers are holding, in anticipation of an advance; preferring, if one is not established, to hold their Hogs, and have them packed, than to sell at the price now offered

Monday's Tribute says of Saturday's New York Stock Market:

Stocks were lower at the opening of business this morning, and through the First Board, but in the Western Shares a firmer tone developed itself after the early transactions, and at the close of the session the martions, and at the close of the session the mar-het looked stronger and better. State Stocks were pressed for sale, and the transactions in Tennessees, Virginias and Missouris were larger than usual, and at a decline of from 1 to 132 per cent. New York Central, after selling down to 71, rallied on a demand for cash stock, and was quite firm at the close, Eric opened at 27 but was haumered with Eric opened at 27, but was hammered with some vigor, and dropped to 25. At this quo-tation it seemed to be upon hard ground, and immediately after the Board rallied to 27 again. Illinois Central was the most act-ive stock among the Western Shares, and the only one which advanced decidedly during the session from opening prices. The first sales were at 57, but at the close the quota-tions were 58½@58½. The market was dull at the Second Board, but considerably firmer and better than in the morning, and there was much less disposition to operate for a decline. State Stocks were in fair demand at an advance of about 1 per cent. over quotations at the First Board. Later in the day prices were still higher, and the market

was quite steady at the close. The same number of the Tribune observes

concerning Money matters: Paper goes with scarcely as much freedom to-day, but the change is not marked. The principal relief in the Money Market is within the circle of Bank dealers. Capital-ists and institutions heretofore employing their Money in Paper have evidently found some other avenue of investment, or are suf-fering their funds to remain idle in Bank, lacking confidence to employ them in mer-cantile credits. The current rates of first-class Paper are 12@18 per cent, the bulk of the transactions being at 15@18 per cent. On demand the market is well susplied at @7 per cent, on favorite securities, and we heard of Money offering to-day as low as

The market is steady but dull for Foreign Bills. The supply is not very large and the demand is moderate. Sterling is 102@10414 for leading commercial and banking names. France are 5.60@5.40.
